

# NATURAL BURIALS – NOW AT SEA

With over fifty percent of funerals in America ending in cremation, the first question many families have is, *“What do we do with the ashes?”* Destination Destiny provides an eco-conscious option for interring loved ones who want their final resting place to be below the surface of the waves, surrounded by the peaceful environment of the ocean floor.

This is an environmentally friendly option beyond columbarium, urns or scattering. This memorial honors a life by fostering new growth.

In collaboration with Memorial Reefs International, Destination Destiny provides an option that delivers a service that helps loved ones celebrate life forever more.

## LIFE AFFIRMING MEMORIAL REEFS

Memorial Reefs are a life-fulfilling way of honoring the deceased by integrating their remains into a concrete “reef ball” that is then submerged at an environmentally-approved ocean location.

With a Memorial Reef, you or your loved one’s final resting place becomes part of an undersea memorial garden where marine life can prosper, and families and friends can explore.

With more than 6,000 Memorial Reefs currently deployed worldwide, these resting place tributes support marine life by increasing biomass and nourishing areas that have been adversely impacted by climate change. Destination Destiny and Memorial Reefs International are proud to be a part of the global effort to restore the seas.

## THE CELEBRATION PACKAGE

This oceanic burial is a multiday event that begins with a celebration of the loved one's life.

### DAY 1

We begin with a sunrise *"Celebration of Life"* service. Your Memorial Reef will be waiting for you complete with a bronze Remembrance Marker. This marker personalizes each Memorial and contains your epitaph. Your family will be invited to participate in mixing the ashes to create the "jewel" core which we adhere inside the Memorial Reef. Each family will be given as much time as they desire to spend in private contemplation with their memorial.

### DAY 2

The Dedication and Placement. In the calm of the morning on-board a small vessel we travel to our permitted Undersea Memorial Gardens. After a eulogy is shared, the group is invited to scatter flowers and tokens of remembrance as your loved one's Memorial Reef is placed on the seabed.

We provide the GPS location of the Memorial Reef so loved ones can continue to visit and witness the bloom of new life as the Memorial Reef supports the marine habitat below the surface.

## LIFE-GIVING ASHES

We understand that it is not always possible to travel to our beautiful Undersea Memorial Garden locations.

Loved ones can still be interred in Memorial Reefs, even when the family is not present. Let us inter the cremated remains inside a Memorial Reef and place it at one of our permitted Reef Locations.

Destination Destiny will complete the process of integrating remains into the Memorial Reef. We will affix the memorial with a bronze Remembrance Marker. This marker personalizes each Memorial and contains the epitaph. We will then dedicate the Memorial Reef on your behalf.

The GPS location of the Memorial Garden is provided so loved ones can visit, and easily find the Memorial Reef each time.

### REMEMBRANCE VACATION OPTIONS

Poseidon approx. size 2'x3', 725 lbs.	\$5,995
Atlantis approx. size 3'x4', 1,600 lbs.	\$7,995
Oceanus approx. size 4'x6', 5,000 lbs.	\$9,995
Custom Size	Call for details
