

# DESTINATION™ *Destiny*

*Resting with Nature...*

Destination Destiny would like to introduce you to the most innovative eco-friendly funeral options available in today's marketplace. Our goal is to help you understand the opportunities, then assist you with expanding your offerings so that you can provide these special options to those seeking a unique experience through celebration of life and the living.

We understand that every location and community has different desires and needs. Our expertise allows us to recognize this, provide best practices for each special circumstance and create appropriate packages that are designed together with the consumer and funeral industry.

Having a keen eye for environmental benefits and concerns helps us introduce the most unique and memorable experiences while creating living memorials that sustain future generations.

Come celebrate the life that was lived by creating a lasting memory of that life thru the living. Among the many services that Destination Destiny provides currently, we offer five Natural Burial locations nationally and Memorial Reef Cremation and Tree of Life Celebrations globally.

Be part of a cultural shift in deathcare that will change how we protect our planet while healing the soul.

One of my associates will be reaching out to you very soon but in the meantime, please review the enclosed materials and don't hesitate to reach out to me directly if you have an immediate interest or need.

Sincerely,

Ed Bixby  
Owner/Operator
